

Day 2: Introduction to the Daily Framework

Daily - Framework

- 1) What are the key characteristics of the specific element in the framework?
- 2) How are the links characterised from/to the previous and following steps?
- 3) What are the required/desired results of the specific element?

Common questions identified yesterday

- Common approach
- Common vocabulary and definitions: ES functions - services
- ES trade-offs: provisioning – regulating
- Usefulness of economic valuation
- Issues of scales
- Entry points for integration: planning, PES, policies

Supporting material for working group discussions (handouts):

- Daily Framework: the overall goal of the ES assessment
- Ecosystem service classification and possible indicators (Groot et al. 2010)
- Overview of Total Economic Value
- Possible way of recording and reporting ES definitions, indicators and units: the example of ES cascade used in ES Assessment in Canada (Kerr et al. 2012)

Ecosystem services as communication tool
